TO WHOM IT MAY CONCERN,

I am writing this to apply for the software engineering intern position that was listed in your company. After reviewing your organization description, it is clear the organization is looking for a candidate that has experience with the responsibilities associated with the role and can perform them confidently. Given these requirements, I am certain that I have the necessary skillset to successfully do the internship program and perform above expectations.

I am a goal-oriented college student (BSc (HONS) Computer Science) currently attending Informatics Institute of Technology in collaboration with University of Westminster. Up to now throughout my academic career, I have been consistently improving and enhancing my knowledge on different technology skills and soft skills which I hope to leverage into the software engineering intern role at your company.

Right now, I want to work for a company like yours where there will be a big stage for an intern like me. Therefore, I would welcome the chance of an interview, where we would be able to discuss in greater detail the value and strength I can bring to your already successful company. Please do not hesitate to contact me via email or phone for further proceedings.

Sincerely,
Danuja Silva

COMPUTER SCIENCE UNDERGRADUATE

DANUJA SILVA

PERSONAL PROFILE

A self motivated individual, dedicated towards working in a challenging environment, enabling the utilization and development of my skills whilst working towards the objectives of the organization.
